DETAILED ACTION

Claims 1-12 are pending and under consideration in the instant application.

Election/Restrictions

Claim 4 is generic to a plurality of disclosed patentably distinct species comprising: Factor VII, Factor VIII, Factor IX, Factor X, alpha1-antitrypsinogen, glucuronidase, a sarcoglycan, an interferon, insulin-like growth factor, and erythropoietin. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

If applicant elects a species from claim 4, applicant is further required to elect a species from claim 9. Claim 9 is generic to a plurality of disclosed patentably distinct species comprising: cyclophosphamide, FK506, anti-CD40 ligand, CTLA4Ig, cyclosporin, antiB71-B72, and an immunosuppressive steroid. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

It would be unduly burdensome for the examiner to search and consider patentability of all of the presently pending claims, due to the unrelated structural compositions in claim 4 and the unrelated structural compositions in claim 9. A restriction for examination purposes as indicated is proper.

Art Unit: 1633

Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 § 1.17(h).
